Implements

Backhoe

Backhoe

Kubota's original BH70 Backhoe is performance-matched with the B-01 Series standard tractors to provide more power and greater digging capacity. It also features a reversible seat for more efficient operation.

Reversible Seat

The B-01 Series tractors feature a new reversible seat. It swivels from front to back, while also providing greater legroom. Designed with the operator's comfort and convenience in mind, it also slides fore and aft without any tools.

4-Point Quick-Attach System

With its pin-and-hook type quick-attach system you can switch easily, between the backhoe and other rear implements, all without tools. This means even complex tasks can be handled with unparalleled efficiency.
