

Kubota-designed Loader Quick Hitch

Front Loader-mounted implements are now a snap to attach and remove, thanks to Kubota's unique Quick Hitch system.

Front Guard (Optional)

Front Axle Capacity

The BX-Series' front axle is built for serious heavy-lifting work, from hauling loaded buckets to moving pallets of materials.

Curved Front Loader Boom

The BX's rounded boom perfectly complements the new overall tractor design. But its benefits don't end there. It also offers greater visibility.

Hose Protection

The loader hoses are tucked inside the boom for greater protection and better visibility.

Convenient Integrated Parking Stand

The BX front loader has an H-shaped stand, which makes it easy to attach and detach. The design also provides additional protection for hoses when the stand is folded.

Front Loader-mounted Implements (Optional)

Optional front attachments include pallet fork and front blade, giving BX-series even greater versatility.

Curved Boom

A curved boom not only allows you to dig deeper, it keeps the boom from contacting the edges of the excavation area. It also increases the lifting height.

Boom and Swing Cylinder Cushion Valves

Standard on the BX25D, an integrated cushion valve ensures smooth movement both horizontally and vertically, minimizing the shock that's transmitted to the operator when the backhoe arm hits range limits.

Wide ROPS

Now Standard across all BX-Series models, the ROPS provides excellent SAE-rated protection. Its wide size offers a lot of shoulder room as well as a great visibility while operating the backhoe.

Mechanical Thumb (Optional)

A positionable mechanical thumb gives the BX25D the ability to grasp and move logs, landscaping materials, and other items with ease, greatly expanding the types of jobs you can do around your property.

Easy Implement Attachment/Detachment

4-point mounting systems at both the front and back of the BX25D simplify attaching and detaching the backhoe, front loader, and other implements. No tools required!

20° Angle of Departure

Steep inclines pose no problem for the BX25D, thanks to its 20o angle of departure. It also means the tractor can be loaded onto trailers with the backhoe mounted.

Protected Hoses

Tucking the hydraulic hoses inside the backhoe boom helps protect them from damage and the elements, thereby increasing their service life. Benefits also include a better unobstructed visibility for the operator.

Ergonomic Controls

The backbone control levers are canted back to provide an easy, wide and unobstructed passage to get on/off the seat. They are also perfectly placed for comfortable and smooth operation, while boots on the bottom parts help protect the mechanisms for a longer service life.

More Legroom

Wide steps on each side of the boom controls provide more room and comfort-for the legs and feet.

Easy-Over Drive Over Deck

Kubota's new Easy-Over mid-mount mower deck for BX sub-compact tractors make removing and attaching mower decks a quick and easy, effortless operation. Available in 54" and 60" deck sizes.

Mid-Mount Mower

You can choose your mower from the best selection of 5 decks, ranging from 48" to 60".

Fine Cut Deck

For finer cutting jobs and more beautiful end results, the Fine Cut Deck is exactly what you're looking for. Kubota's baffle structure allows the grass trimmings to be cut more finely, giving you a more professional finish. Our Fine Cut Deck also offers excellent performance with our optional mulching kit.

Standard Deck

This 3-blade mower offers a wide cutting area, allowing you to cut more grass in a single pass. Choose a 48"/54" deck for the BX1870 or a 54"/60" deck for the BX2370/BX2670/BX25D.

High Clearance

With 6 inches of clearance – more than any other tractor in their class – the BX-Series tractors easily travel over uneven ground and raised obstacles.

Mowing-Height Adjustment Dial

A simple twist of the dial adjusts the mower height in ¼" increments to your desired cutting level.

Durable Shaft Drive

The BX-Series' shaft drive delivers power smoothly from the mid-PTO to the mid-mount mower. Unlike belt drives, there is no slippage and maintenance is minimal.

Easy Attach/Detach

Implements such as the loader or mower can be attached and detached quickly and easily-saving you time and effort.
